AMWAYPROMISE is our global consumer protections communications platform. Our goal is to deliver the most comprehensive customer service and consumer protections offering in the direct selling industry.

The direct selling industry is self regulated by a Code of Ethics established by the World Federation of Direct Selling Associations (WFDSA) that states that direct selling companies and independent sellers shall not use misleading, deceptive or unfair sales practices.

Most countries also have individual Direct Selling Association codes of ethics that localise the WFDSA Code under applicable laws and regulations. Amway adheres to these codes through its consumer protections, which **AMWAYPROMISE** brings together under the following pillars:

LOW-COST, LOW-RISK OPPORTUNITY

CUSTOMER SERVICES

Support that's always within reach.

Whether you're an ABO or a customer, we're here to help — face-to-face, over the phone, or online. Our team is committed to providing the best service every step of the way.

THE RIGHT TO KNOW

Knowledge is power.

We promise to clearly communicate and make easily accessible all information related to the above consumer protections, as well as to our Inventory Buy-Back policy and Cooling Off Period.

NUTRILITE'S TRACEABILITY PROCESS

Are you certain the ingredients in the supplements you consume will effectively safeguard your health? At Nutrilite, we trace every ingredient in our supplements to ensure they are Pure, Safe and Effective. Go behind the label and follow our outrageously detailed 9-step Traceability process that brings you the purest, safest and most effective Nutrilite supplements.

CHOOSE THE BOTANICAL

1,300 plant nutrient-fingerprinted botanicals in our functional target library lead us to the best ingredients and ingredient combinations.

1

SEED SELECTION

MILLIONS

2

of seeds planted each year, and not just any will do! We test our seeds for things like organic nature, purity and germination rate.

3

CHOOSE THE FARMS

Our nearly **6,000** acres of organic farmland is only the start. If we can't grow it ourselves, we find the best partner farms.

HARVEST

We move plants within as little as **20** minutes from field to on-site dryers to ensure the highest nutrient levels.

5

4 GROW

Every botanical has a BIRTH CERTIFICATE, and each is grown **99%** weed-free, with no chemical pesticides.

7 MANUFACTURING

We conduct **500,000** quality checks on our ingredients each year.

6

EXTRACTION

Skin, seeds, roots, leaves...we concentrate or dry the parts of the plant that give us the highest level of nutrients.

8

PACKAGING

Shake, squeeze, twist, x-ray. We test our packages more than **30,000** times each year.

YOU

Our traceability process begins and ends with you.

9

A HEALTHY GUT IS KEY TO A HEALTHY YOU

Our health starts from our gut. Science has shown it does more than just aid digestion. In fact, it is the **master key to unlocking the secrets to optimal health.**

Let's embark on a health and wellbeing journey where your gut plays host to the superheroes of your health story!

WHAT IS A GENOME?

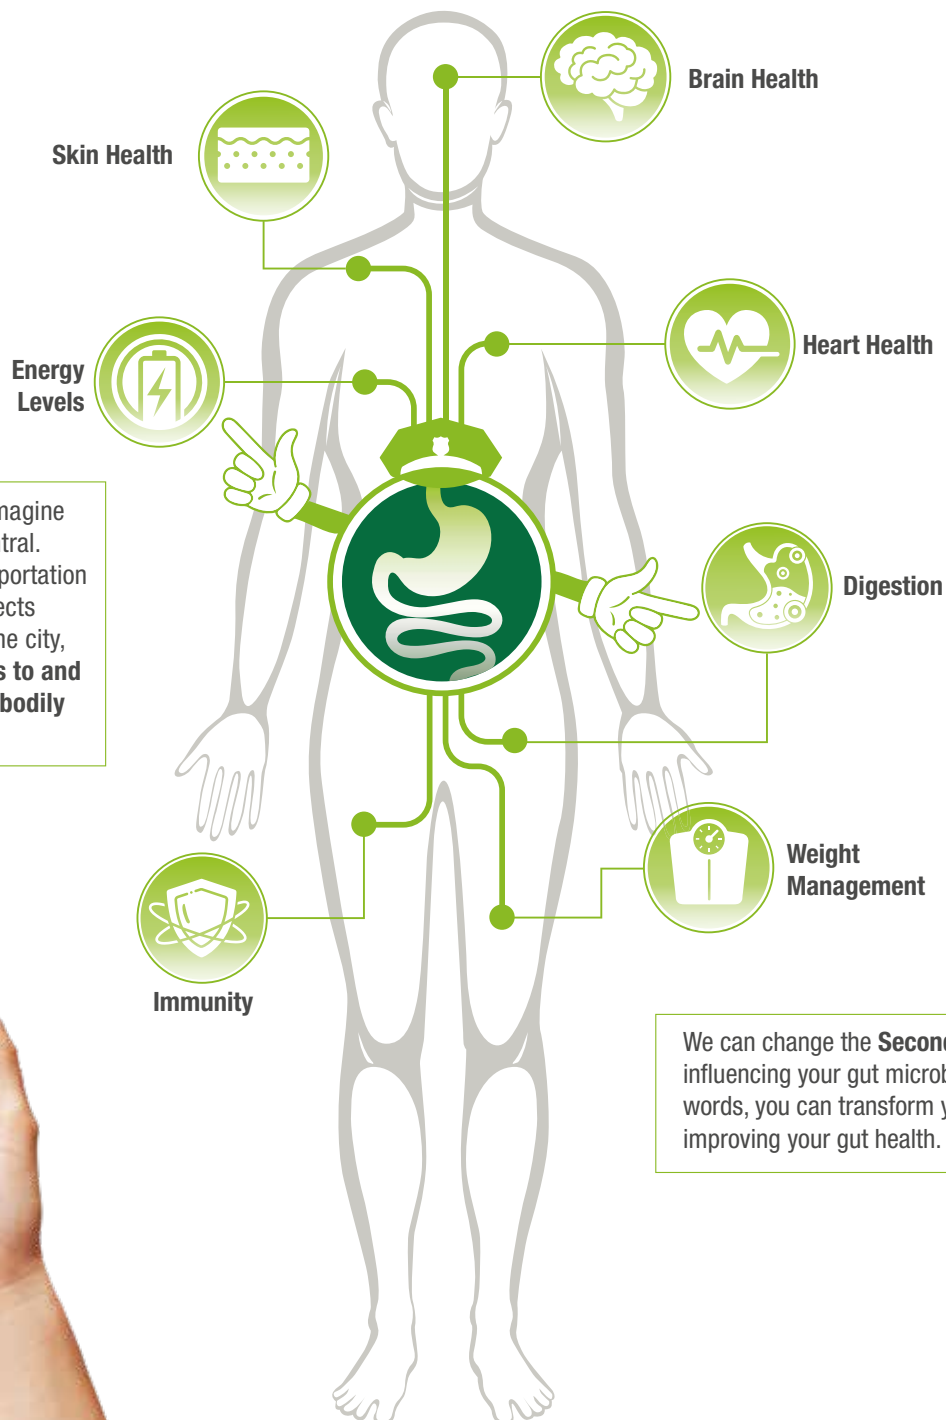

A genome is the complete set of genes or genetic material present in a cell or organism. The DNA in your cells is essentially the blueprint that makes you who you are.

THE FIRST GENOME

are the genes you inherited from your parents that cannot be altered.

YOUR SECOND GENOME: YOUR GUT MICROBIOME

Your gut contains trillions of microorganisms that have their own genes, collectively known as the **gut microbiome**. This microbiome is so influential on your health that it's often referred to as your **Second Genome**.

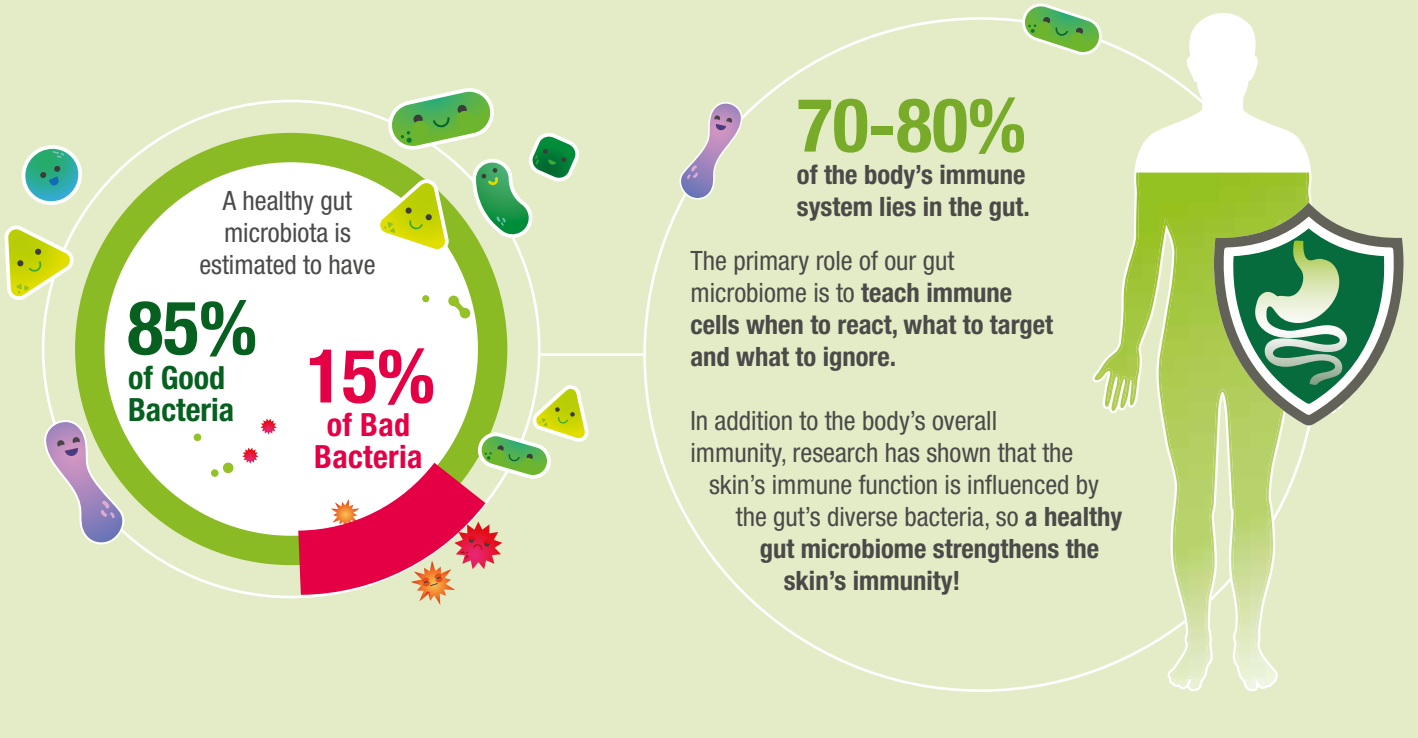

To illustrate this, imagine your gut as KL Sentral. Just like this transportation network hub connects different parts of the city, **your gut connects to and supports various bodily functions.**

We can change the **Second Genome** by influencing your gut microbiome. In other words, you can transform your health by improving your gut health.

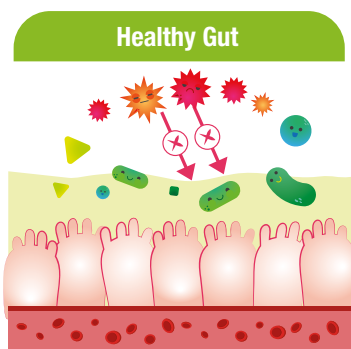

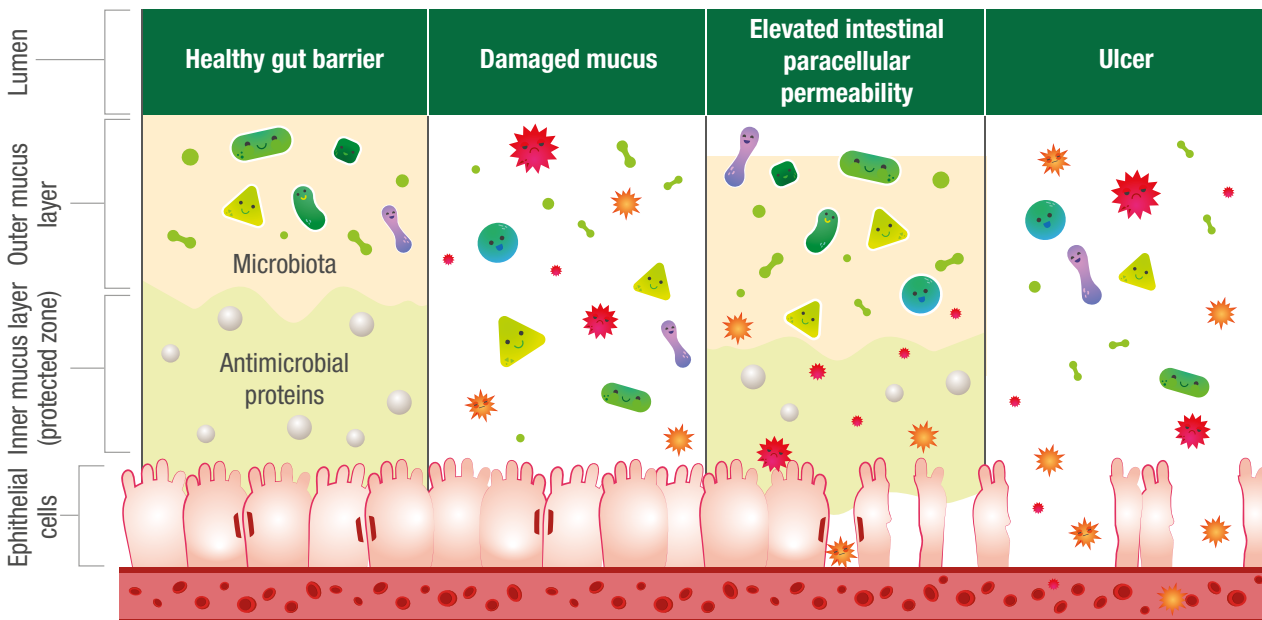

WHAT IS THE GUT MICROBIOME?

Your gut microbiome is home to an estimated **100 trillion** gut bacteria.

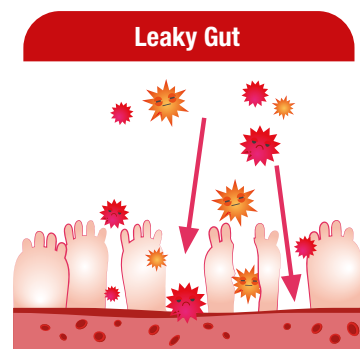

GUT LINING: YOUR BODY'S FORTRESS

Think of your gut lining as a fortress wall. When it's strong, it keeps harmful invaders out. However, when your gut lining is damaged, it becomes permeable, leading to what is known as a "leaky gut".

Healthy cells bind closely together to form a protective 'shield', whereas unhealthy cells leave gaps that allow bad bacteria to penetrate the gut lining.

ESTABLISHING A STRONG GUT FOUNDATION

Achieving optimal health requires a healthy gut. Among others, a healthy gut can help:

Boosts your energy levels

Enhance your digestive comfort

Experience healthier skin

YOUR GUT NEEDS

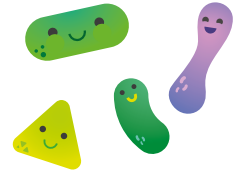

PROTEIN

to support the repair and maintenance of the gut lining, especially during sleep. Also helps the body to utilise nutrients effectively.

PREBIOTICS

to supply the food they need to thrive (like superheroes refuelling after a long day of saving the world).

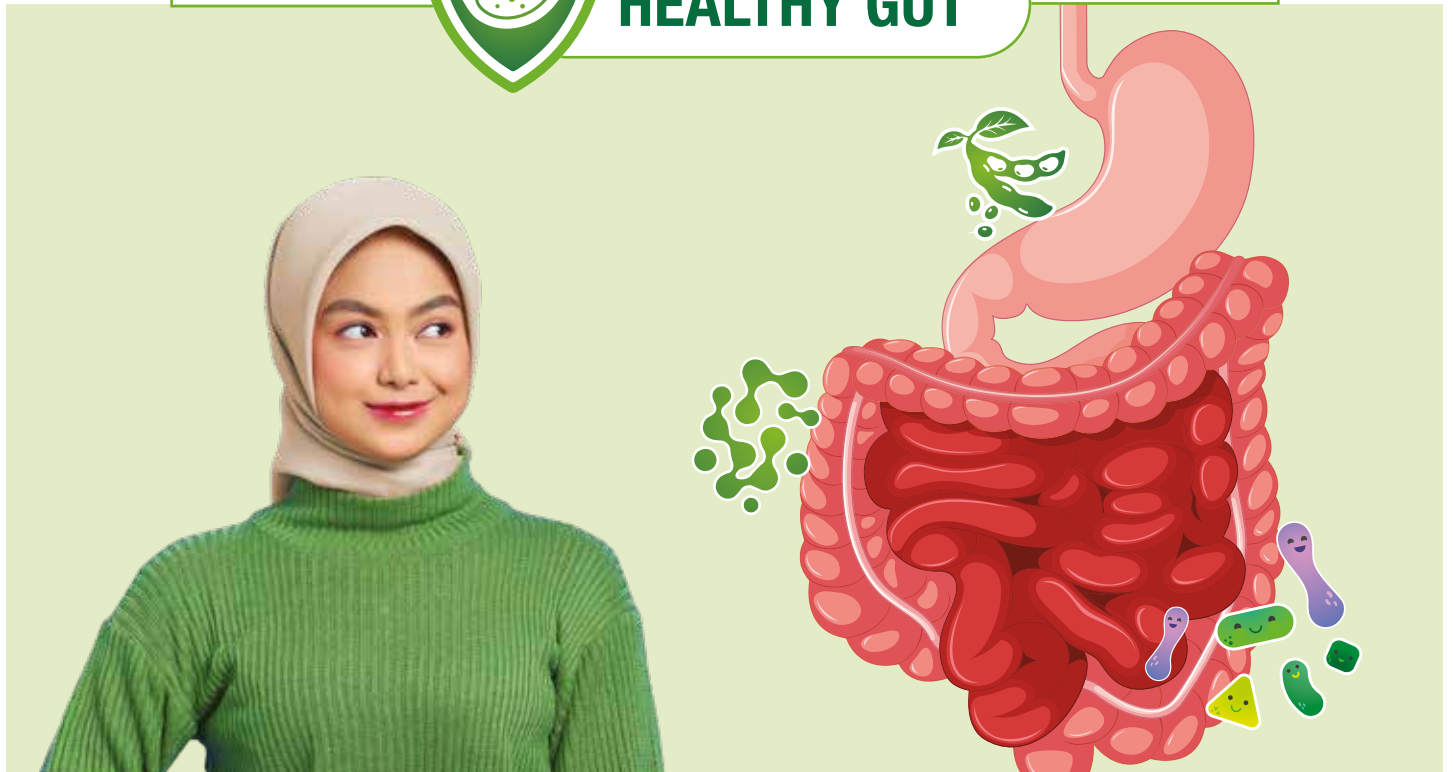

PROBIOTICS

to replenish beneficial gut bacteria to maintain a balanced gut microbiome.

HEALTHY GUT

When you nurture your gut, you create a strong foundation for better health.

A HEALTHY GUT = A HEALTHY YOU
